

What is the justification for across the board increases and adding new services to taxable services list? How will the additional tax revenues be used? Are these permanent increases or temporary and what is the time limit for these changes? What services will not be taxed that were considered as potential new revenue sources? Why were these rejected and excluded from the present list of proposed new taxable services?

These revenues sure better not be used to increase the salaries of legislators or other public officials proposing these changes!!
