Subject: Taxes on veterinary care

Surly you don't plan on placing a tax on veterinarian care

Costs for vet care is bad enough without adding to it.

Many seniors like myself , on a fixed income are finding it difficult to afford proper care for my pets. This tax would place an extra burden, and could possibly mean that care for pets would suffer.

Many might even find it necessary to give up their pet. Pets have shown to be beneficial to the health and wellbeing to people, especially seniors

Please consider deleting this tax from the budget.

Thank you
