Subject: taxes

Once again another letter. Everyone that is elected in office certainly knows right from wrong so this email sure sends the message that I also no right from wrong. quick case and point in the Stonebridge Restaurant world. I have been figuring out for the last two years how to keep my full time employees down below 50. that means sections in my restaurant that are closed. contemplation of closing for entire winter so when they do the four month evaluation I am under the 50 rule. most of you know me and quite frankly this state has defiantly taken my work ethics on growth and shrunk them. Oh well I guess they really don't understand what sales and use tax is really doing to businesses like mind that pay a lot. please do the math annual sales approx. 4,000,000.00 a year and rate of 6.35 =254,000.00 which for a small restaurant is not bad. also I got the word from all my young employees that they had to pay the state 200 or 300 this year and all prior years where getting money back. please figure it out another way. I know you can I have faith in you and oh yes I voted for all of you. thanks rich conine. PS sorry for the little sarcasm at the end. also helpers of your bosses please let them read my letter

Sincerely,  
richard conine
