

You write a letter saying there should be public hearings on 2 billion dollars in tax increases. Why not ask why has fiscal management been so poor that they are required. Public pensions and state government expenditures are so out of control unless something is done to correct them they will have to tax the air we breath because they are already taxing every conceivable thing people require to live in this imploding state. You have to do better because you are going to run out of other people's money.
