

To all,

Raising taxes is never the solution to over spending. The tax payers cannot always be the escape goats for poor spending by the CT government.

When will the government stop over paying government workers like police, teachers, firefighters and their very high retirement plans.

It's hard to imaged that CT cannot pay its bills with one of the country highest taxes plus gambling and lottery incomes.

Is it not time to ask the unions to pay their share and stop putting the burden on the middle class tax payers.

I have been a tax payer for the last 35 years and lived in this state for 50 plus years, but with this continued Ct out of control spending and taxes increase I cannot see myself retiring in this state.

Please get CT back on responsible spending and not tax hike,

Thank you

Carlos
