Subject: Tax Hike - Public Hearing Testimony

Dear Senator Fasano and Representative Klarides:

I have been a Certified Public Accountant in Connecticut for over 30 years. I am against taxing the services of Certified Public Accountants as well as the other professions. By proposing this sweeping tax increase the legislature will be sending a clear signal that it is anti-business and anti-growth. We cannot TAX our way back to prosperity.

A recent Gallup poll listed Connecticut as being number 2 out of the 50 states as the state "where the most residents would leave if they could" and the main reason for leaving was "work / business related". By allowing this tax proposal to move forward it appears that we are looking to become the number 1 state that most residents want to leave.

Thank you,

Martin H. Squire, C.P.A.
