

Since the beginning of Malloy's tenure we have had budget deficits. the people of this state cannot afford more taxes. Our youth are having an abysmal time finding work, We have a 210% increase in heroin overdose deaths. What good things are happening? the one thing that makes sense is the Second Chance Initiative. We have a huge heroin epidemic in Ct. I heard someone from the Dept of Health report that Connecticut has the greatest access to drugs than any other state in the country. Time to fix things, stop the dangerous cuts and taxes. Nancy Maroney, resident of North Haven, Ct
