Subject: taxes

Hi everyone. it does not take much common sense to know increasing the taxes everywhere is only going to hurt the small business owners and the trickle down effect is to the normal everyday person on the street. if everything continues to rise people will not be able to afford to eat out,go to the movies, go on vacation, go anywhere. Imagine paying 10.00 for a big Mack and 4.00 for a coke at McDonalds. That is where the everyday person eats. trust me I do know each of you already knows this so you really already know what to do. thanks for taking time and reading this. rich conine

Sincerely,
richard conine
