Subject: Budget Thoughts

I have been a resident of Ct for all my 64 years and planned to live out my retirement in the home I have owned for 35 years. The states fiscal decisions over the last 4+ years have put that planning in jeopardy. Another large tax increase which targets the retirement income I need to support my wife and I will cause me to leave the only state I have resided in. I have watched and listened to the legislature and governor during this legislative session. I was originally buoyed by the governor's no new tax promise only to have the legislature propose new programs and taxes. Please help me stay in this state by standing by the governors promise of NO Tax Increase. Thank-you.

Sincerely,

Robert Brouillier
