

Stop taxing us and start eliminating waste while reducing spending. Connecticut already confiscates more money from its residents than any other State – when you combine all of the various forms of taxes imposed. Furthermore, the Legislature and Governor passed the largest tax increase in Connecticut’s history in Malloy’s first term. What are you doing with all of our money?

Remember, it is our money, not Hartford’s. Too many politicians and bureaucrats spend too much time wasting our tax dollars and figuring out new ways to leech off the private sector. Get out of my wallet | Reduce taxes and regulations | Focus on improving the economic situation | Be accountable and responsible.

The blueprint for successful fiscal management exists in many States across the nation. Spend some time studying how they achieved surpluses and fewer hours on how to reach into your resident’s pockets.
