Re: Docket No. 17-10-\_\_ - Application of The Connecticut Light and Power Company d/b/a Eversource Energy to Amend its Rate Schedules – Notice of Intent

Dear Mr. Gaudiosi:

The Connecticut Light and Power Company d/b/a Eversource Energy (“Eversource” or the “Company”) submits this letter as preliminary notice to the Public Utilities Regulatory Authority (“PURA”) pursuant to R.C.S.A. § 16-1-22(b) that the Company intends to file an application to amend its existing distribution rate schedules to address a revenue operating deficiency. The Company’s application will propose a three-year plan to recover additional revenues for the period May 21, 2018 through May 20, 2019 (“1<sup>st</sup> Rate Year”),<sup>1</sup> May 21, 2019 through May 20, 2020 (“2<sup>nd</sup> Rate Year”), and May 21, 2020 through May 20, 2021 (“3<sup>rd</sup> Rate Year”). The Company’s detailed rate application will be filed on November 22, 2017.

Article 1.3 of the amended Merger Settlement Agreement, which was approved by PURA in Docket No. 12-01-07, requires Eversource to file an application to amend its distribution rates in order to set new rates no later than July 1, 2018.<sup>2</sup> The Company, therefore, is submitting this notice in compliance with that obligation in the amended Merger Settlement Agreement. The Company last filed an application to amend distribution rates almost three and one-half (3½) years ago on June 9, 2014.

The Company’s application will demonstrate that the rate amendment is necessary to enable Eversource to recover investments in the electric distribution system, and the increased costs resulting from those investments like increased taxes and depreciation expense. In addition, the rate amendment is necessary to enable the Company to recover the costs of providing safe and reliable electric service to its 1.2 million electric customers, excellent customer service, and to

---

<sup>1</sup> May 21, 2018 is 180 days after the date on which the Company’s detailed rate application will be filed on November 22, 2017.

<sup>2</sup> Docket No. 12-01-07, Application for Approval of Holding Company Transaction Involving Northeast Utilities and NSTAR. PURA approved the Merger Settlement Agreement between Northeast Utilities, NSTAR, the Office of Consumer Counsel and the Attorney General in its April 2, 2012 final decision in this docket. On April 20, 2017, PURA approved an amendment to the Merger Settlement Agreement that established July 1, 2018 as the outside date for new rates.

provide a fair return to investors in order to access the funds needed to pay for the poles, wires, structures and systems that are integral to the delivery service it provides to customers. The proposed rates will also include recovery of system resiliency costs that were already approved by PURA in other dockets.

Specifically, the Company's application will demonstrate that the distribution operating deficiency primarily exists due to the substantial amount of capital investment that is being devoted to the Company's electric distribution system to increase its reliability and resiliency. Since the end of the rate year from the Company's last rate case on November 30, 2015 and through the end of the final rate year in this rate case, the Company will invest at least \$2 billion to install and improve electric distribution infrastructure serving the 149 cities and towns within its service territory, with over \$373 million of that investment already spent but not yet included in distribution rates. Rates now need to be updated to reflect these additional investments in the system.

The Company's investment in electric distribution infrastructure improves public safety, increases service reliability, and raises the service quality experienced by customers. This investment has yielded improvements in key performance metrics for electric service. For example, 2016 was one of the Company's best years on record for responding to customer outages. Its average restoration time was six minutes better than the previous year.<sup>3</sup> In addition, overall electric reliability for 2016 – as measured by the average outage time experienced by customers – was among the lowest ever at 84.1 minutes.<sup>4</sup>

In addition to providing safe and reliable service to customers, investment in electric distribution infrastructure is also important to the economy of Connecticut and the 149 municipalities the Company serves. For example, the Company's infrastructure upgrades have a direct impact of supporting jobs and increasing vital property and other taxes. New federal, state and municipal taxes are approximately \$81 million in the 1<sup>st</sup> Rate Year, \$16 million in the 2<sup>nd</sup> Rate Year, and \$12 million in the 3<sup>rd</sup> Rate Year. The Company recognizes that these corollary benefits of a robust, consistent investment program are important to the State and the municipalities it serves.

Moreover, another primary driver of the Company's need for rate relief is increased depreciation expense for electric distribution equipment that continues to deliver reliability. Depreciation is an expense that is directly associated with the Company's capital investment. This expense is also increasing due to the expiration of a bill credit the Company had been providing to customers annually since 2010. Increased depreciation expense is approximately \$79 million in the 1<sup>st</sup> Rate Year, \$10 million in the 2<sup>nd</sup> Rate Year, and \$10 million in the 3<sup>rd</sup> Rate Year.

These three factors combined – increased investments in the electric system, taxes and depreciation – account for approximately 72%, 71% and 79% of the Company's operating deficiency for the 1<sup>st</sup>, 2<sup>nd</sup> and 3<sup>rd</sup> Rate Years, respectively.

---

<sup>3</sup> Docket No. 86-12-03, CL&P Transmission And Distribution Reliability Performance Report ("TDRP"), filed March 31, 2017 in compliance with Order No. 12, TDRP at Page 3.

<sup>4</sup> Id.

The Company is providing copies of this notice today by mail or personal delivery to the Governor of the State of Connecticut, the chief executive officers of every municipality located within the Company's franchise area, and the Office of Consumer Counsel.

In addition, as required by R.C.S.A. §§ 16-1-22(b) and 16-1-53a and by Paragraph 1.1 of PURA's Standard Filing Requirements for Large Public Utility Companies, the Company provides the following information:

1. In its rate amendment application, the Company will request that PURA review and approve recovery of the following:
  - (a) A distribution revenue operating deficiency of approximately \$255.8 million for the 12-month 1<sup>st</sup> Rate Year beginning May 21, 2018.<sup>5</sup> This represents an average increase of approximately 6.79 percent over total currently authorized overall revenues for all customers and rate classes combined.
  - (b) A distribution revenue operating deficiency of approximately \$45 million for the 12-month 2<sup>nd</sup> Rate Year beginning May 21, 2019. This represents an average increase of approximately 1.12 percent over the previous year's proposed overall revenues for all customers and rate classes combined.
  - (c) A distribution revenue operating deficiency of approximately \$36 million for the 12-month 3<sup>rd</sup> Rate Year beginning May 21, 2020. This represents an average increase of approximately 0.88 percent over the previous year's proposed overall revenues for all customers and rate classes combined.
2. The Company's request for rate relief will result in changes to various subcomponents of the Company's rates and rate design. The exact nature of any changes will ultimately depend upon the nature of the allocations that PURA determines in this and other related proceedings.
3. The service area to be included in the application is as shown in Exhibit 1.
4. A list of the municipalities and the names and addresses of the municipal chief executive officers to whom this notice was sent is shown on Exhibit 2.
5. The test year is the 12-month period ending December 31, 2016 and the date certain (last day of test year) is December 31, 2016.

---

<sup>5</sup> The 1<sup>st</sup> Rate Year operating deficiency of \$255.8 million reflects an \$8 million adjustment related to incremental system resiliency costs that PURA previously approved in Docket Nos. 12-07-06, Application of the Connecticut Light and Power Company for Approval of its System Resiliency Plan, Jan. 16, 2013 Decision, and Docket No. 12-07-06RE01, Application of the Connecticut Light and Power Company for Approval of its System Resiliency Plan, June 3, 2015 Decision.

Respectfully submitted,

THE CONNECTICUT LIGHT AND POWER COMPANY d/b/a EVERSOURCE ENERGY
